# Get Insights from
ALL your data in real time.

Avrio is a revolutionary AI-powered Enterprise Data platform that streamlines the entire data journey, dramatically reducing costs and time-to-insight.

Avrio comes with a plethora of capabilities like **federated query, governance, data productization, and Agentic AI for autonomous workflows** along with the ability to generate **AI-powered insights** conversationally, enabling you to *"Converse* **with your data and shape your tomorrow***"*.

What is Avrio?

Avrio accelerates your data-to-AI journey with a no-code platform that connects federated data, productizes it for an enterprise marketplace, and enables consumption through Gen BI, Conversational AI, and automated execution via Agentic AI. By consolidating numerous data tools, Avrio's foundation empowers autonomous agents to reason across systems—executing secure, compliant end-to-end workflows with human-in-the-loop collaboration for transparent, actionable outcomes.

What does it really mean at execution level?

> **Imagine all enterprise and third-party data being available as data products to authorized users so they can easily apply GenAI and conversational analytics on the complete data set to get illuminating insights.**
>
> **All this with ZERO coding or querying.**

Meet Avrio Conversa

Avrio Conversa lets you converse with all your data to unlock unprecedented possibilities. With Avrio Conversa you can get:

Analytics	Visualize and make sense of data quickly
Insights	Discern what data is holding within
Opportunities	Identify the growth areas
Risks	Know the risks involved
Decisions	AI-driven recommendations without bias

Avrio Features

|	
Data Productization and Marketplace	• Productize and publish data • Reusable data products • Eliminate redundancy
Connectivity Across Data Sources	• Connects to 50+ data sources out-of-box • Structured or unstructured data • Internal or external data
Analytics & AI Acceleration	• Streamlined data access across sources • Single platform to integrate with every data source • Handles all kinds of data
High Performance Query Engine	• Fast query engine • Efficiently scalable • Improved time to insights
GenAI Powered Analytics	• Enhanced data comprehension • Conversational analytics • Holistic insights based on all data
Agentic AI Intelligence Layer	• Deploy autonomous AI agents from our marketplace • Agents that think, plan, and adapt – not just automate

Avrio Delivers

Holistic Data Insights: Avrio provides a comprehensive view of your business, empowering informed decisions, opportunity identification, and risk mitigation.

Conversational AI: Query all data, structured and unstructured, using intuitive language and get real-time insights

Avrio Delivers

Agentic AI Intelligence: Deploy autonomous AI agents from our marketplace

All-in-One Data to AI Platform: Consolidate your entire data journey under a single No-Code, hyper automated platform. Eliminate multiple tools, reducing complexity and costs.

Self-Serve Analytics Platform: Empower business users to access and analyze data independently, reducing reliance on data analysts.

Proactive Quality Assurance: Systematically improve data quality by identifying and addressing issues preemptively, ensuring reliable insights.

Seamless BI and AI Integration: Effortlessly connect with your existing BI and AI/ML tools for a unified analytics ecosystem.

Data Lakehouse: Seamlessly transform and centralize analytics data into a unified lakehouse

Notebooks: Craft sophisticated queries and ML models without coding. Our AI Assistant generates SQL and Python codes for you.
